

Technology - Change Solutions

Complex Transitions - Reducing the Risk

Merging applications, changing technology platforms and migrating legacy systems is complex work and challenging in the best of conditions. The risk associated with these inevitable and essential transitions often poses a seemingly insurmountable feat. Harnessing the productive aspects of these changes, managing risk, carefully planning, defining consistent and enforceable process and providing employees with the tools to succeed allows organizations of all sizes to meet the challenge.

Evantec your company with the tools and resources to:

1. Make the Right Decisions
2. Plan, Coordinate and Execute
3. Improve Efficiency
4. Ensure Control and Scalability
5. Minimize Risk
6. Ensure Continuity
7. Educate, Train and Support

These seven (7) elements help us guide the development of solutions and measure our own success in delivering value to our customers.

Solutions

Evantec helps healthcare, pharmaceutical and biotechnology companies navigate the complexities of technology transitions and application restructuring.

Technology – Change Solutions offers a broad spectrum of enterprise and end-user application implementation solutions. Each solution is based on industry recognized methodologies and is customized to meet the unique needs of each organization. Insight, experience and best practices gained from over 15 years of implementation are the cornerstone of each program. Each solution combines elements from the following:

- Application/Product Evaluations
- Business and System Analysis, System Requirements Definition
- Program and Project Management
- Business Process Definition
- ERP and CRM Best Practices
- Intranet/Internet/Web Portal Design, Development & Optimization
- Education, Training and Support
 - Upskilling Programs
 - Software/Application and Custom Training
 - Help and Knowledge Base Systems
